

Dr. Sakshi Bharti

Life Science Data | Clinical Research Operations | AI & Analytics

Frankfurt am Main / Königstein im Taunus, Germany | sbinfo90@gmail.com | +49 176 57988675
LinkedIn: linkedin.com/in/sakshibsharma | GitHub: github.com/sakshianil | Work authorization: Germany - work permitted

PROFESSIONAL PROFILE

PhD-qualified bioinformatics and systems biology professional combining life-science research, clinical data programming concepts, AI-enabled workflow design, and business-facing analytics experience. Experienced in computational biology, omics data workflows, SQL/C#/R/Python/SAS-based data work, documentation, stakeholder coordination, and startup operations. Interested in IQVIA roles across Clinical Research, Technology & Analytics, Real World Evidence, Statistical Services, Scientific Data Analytics, AI/ML-adjacent data workflows, and consulting-oriented life-science teams.

I bridge healthcare/life-science science, messy real-world data, technical implementation, and stakeholder communication in line with IQVIA's focus on healthcare data, advanced analytics, technologies, scientific expertise, and improved patient outcomes.

TARGET IQVIA ROLE AREAS

- Clinical Data / Statistical Programming Support
- Real World Evidence and scientific data analytics
- Technology & Analytics / AI-enabled workflow roles
- Bioinformatics and life-science data analyst roles
- Clinical research operations and project coordination
- Consulting or solutions roles needing science, data, and client communication

IQVIA-RELEVANT STRENGTHS

- Life-science research depth:** PhD research in biology/bioinformatics with biological interpretation, literature review, reproducible analysis, and scientific reporting.
- Data and analytics execution:** SQL, C#, R, Python, SAS, database management, business-intelligence analytics, data cleaning, quality checks, reporting, and structured documentation.
- Clinical data orientation:** Working knowledge of CDISC SDTM, ADaM, TLF generation, SAS/R workflows, data transformation, validation concepts, and reporting outputs through a pilot study.
- AI and technology mindset:** Project work in RAG systems, AI agents, prompt engineering, document search, automation, Streamlit/Gradio prototypes, APIs, and workflow architecture.
- Cross-functional communication:** Experience working with scientists, technical teams, founders, business clients, partners, and non-technical stakeholders.
- Business-facing life-science experience:** B2B sales support, service positioning, opportunity research, proposal coordination, and client follow-up at Aomics GmbH.

PROFESSIONAL EXPERIENCE

Chief Operating Officer / Bioinformatics & AI Operations - Aomics GmbH

Germany | Part-time | 2020-Present

- Support operations, strategy, and cross-functional execution for a startup at the intersection of bioinformatics, AI, and life sciences.
- Contribute to B2B sales through prospect research, client/partner communication, service positioning, proposal coordination, and follow-up.
- Translate scientific and technical capabilities into clear business value for client-facing discussions and practical service offerings.
- Delivered database-management and business-intelligence analytics services for external business clients, including work with established firms.
- Applied SQL and C# in database and analytics workflows supporting reporting, analysis, and business decision-making.
- Contribute to AI-enabled product thinking, automation opportunities, bioinformatics service development, workflow organization, and technical documentation.

Guest Researcher / Doctoral Researcher - Senckenberg Biodiversity and Climate Research Centre & Goethe University Frankfurt

Frankfurt am Main, Germany | 2017-2026

- Conducted doctoral research in biology/bioinformatics focused on oomycete promoter regulation and computational analysis of biological sequence data.
- Designed, executed, and documented research workflows involving biological data analysis, interpretation, literature review, and scientific reporting.
- Worked with omics and sequence-analysis concepts, reproducible research practices, quality-aware data handling, and structured scientific communication.
- Collaborated with supervisors, research teams, and interdisciplinary stakeholders to develop hypotheses, interpret results, and communicate findings.

Research Associate - Punjab Agricultural University, Department of Agriculture

Punjab, India | 2014-2016

- Assisted day-to-day management, implementation, and administration of research by the Oil-seeds Research Group in Plant Breeding and Genetics.
- Established analytical computational pipelines for large NGS sequencing and other omics datasets from Brassica species.
- Developed R and Python workflows to automate bioinformatics processes including data collection, cleaning, integration, and management.
- Collaborated with plant breeders, molecular scientists, and experimental teams to define analysis questions, design experiments, prioritize hypotheses, and interpret results.

Founder - Lovemeer

Königstein im Taunus, Germany | 2025-Present

- Founded and operate a wellness-focused platform covering brand positioning, customer communication, supplier outreach, operations, and AI-assisted workflows.

Co-founder / Bioinformatics Lead - AI-genics and Startup Projects

Germany | 2021-2025

- Contributed to early-stage concepts in bioinformatics, AI, and health/life-science technology, including research-to-product translation, technical planning, service design, and automation ideas.

SELECTED PROJECTS

Clinical Data Standards and Statistical Programming Pilot Study

- Completed a pilot workflow covering SDTM mapping, ADaM dataset preparation, TLF generation, SAS programming, R programming, data checks, and reporting concepts.
- Created beginner-focused GitHub workshop materials to teach reproducible programming workflows and version-controlled project practice.

AI / RAG / Data Workflow Projects

- Built learning projects around retrieval-augmented generation, document indexing, embeddings, vector database concepts, agent workflows, and Streamlit/Gradio user interfaces.
- Explored practical AI architectures using LangChain, LangGraph concepts, OpenRouter, Tavily, Hugging Face tools, n8n, Gmail, Google Sheets, and API-based automation.

Bioinformatics and Omics Research Workflows

- Developed and documented computational workflows for biological sequence analysis, promoter-regulation research, NGS/omics data handling, and biological interpretation.
- Combined scientific problem framing, data cleaning, analysis, literature synthesis, and technical documentation across academic and applied research environments.

TECHNICAL SKILLS

Clinical and healthcare data: CDISC SDTM working knowledge, ADaM working knowledge, TLF generation concepts, SAS programming, R programming, data preparation, data transformation, quality checks, reporting workflows, clinical research operations awareness.

Data, programming, and analytics: SQL, C#, Python, R, SAS, JavaScript fundamentals, Jupyter/Colab, Markdown, Git/GitHub, database management, relational data workflows, business-intelligence analytics, client analytics services.

Bioinformatics and scientific analysis: Bioinformatics, systems biology, molecular biology, promoter regulation, sequence analysis, NGS/omics workflows, biological data interpretation, literature review, reproducible research, scientific reporting.

AI, automation, and workflow architecture: RAG, AI agents, prompt engineering, LangChain, LangGraph concepts, vector database concepts, OpenRouter, Hugging Face tools, Tavily, Gradio, Streamlit, n8n, Gmail/Google Sheets automation, APIs, modular data flows.

Business and communication: B2B sales support, business development, client communication, partner communication, service positioning, proposal coordination, stakeholder management, technical documentation, scientific writing, training materials.

EDUCATION

PhD in Biology / Bioinformatics

Goethe University Frankfurt & Senckenberg Biodiversity and Climate Research Centre, Germany | 2017-2026

Dissertation focus: oomycete promoter regulation and computational biological analysis.

MSc in Systems Biology and Bioinformatics | Panjab University, India | 2011-2013

BSc (Hons) Bioinformatics | Panjab University, India | 2008-2011

Diploma in Nutrition and Public Health | IGNOU, India | 2016-2017

CERTIFICATIONS, TRAINING, AND ADDITIONAL INFORMATION

- German language: B1 certified; currently improving toward B2 business communication.
- DAAD scholarship for PhD research in Germany.
- Hands-on GitHub workshops for beginners covering reproducible programming and version-controlled workflows.
- Ongoing applied training in AI agents, RAG systems, prompt engineering, automation, and full-stack AI application development.
- Full publication list: orcid.org/0000-0001-5356-7666

LANGUAGES

English: Fluent | German: B1 certified, improving toward B2 | Hindi/Punjabi: Native or professional working proficiency
